PRODUCT CATALOG

2026 COLLECTION

MAIN FIELDS

1

Waterproofing Systems

Integrated solutions to protect surfaces and structures from water leakage and moisture, ensuring long-term durability.

2

Industrial Flooring Systems

High-performance flooring that withstands heavy loads, friction, and chemicals in industrial environments.

3

Thermal Insulation

Effective insulation systems that reduce heat transfer and contribute to improving energy efficiency.

4

Concrete Mixes

Specialized materials and additives to improve concrete properties, increasing strength, durability, and

5

Expansion Joint Systems

Engineering solutions to accommodate structural movement and prevent cracks, while maintaining insulation and durability.

6

Concrete Repair Solutions

Advanced systems for repairing and treating damaged concrete elements and restoring their structural efficiency.

PRODUCTS

ECOPEARL SHPU-35-34A

- Spray-applied polyurethane foam

Sika® Ucrete® MF

Heavy-duty polyurethane cement flooring system

Sikalastic® M 862

Two-component, a pure polyurea waterproofing membrane

CONCRETE ADDMIXER

Sika® ViscoCrete® GL 51

- High-range water-reducing admixture that enhances concrete workability and strength

SikaControl®-707 WT

- Concrete admixture designed to improve workability, reduce water demand

SikaLatex®-141

- Acrylic bonding agent and mortar admixture that improves adhesion, flexibility, and durability

SikaControl®-3760 WT

- Concrete admixture developed to enhance performance, and concrete waterproofing

SikaFiber®-012

- Polypropylene microfibers used in concrete and mortar to reduce plastic shrinkage cracking

EXTERNAL WATERPROOFING

Sikalastic®-1 C Primer PU

Single-component polyurethane primer

Sikalastic® M 640

- waterproofing membrane offering seamless and durable protection.

Sikalastic®-670 TC

- Protective topcoat providing enhanced weather resistance

Sikalastic® M 862

Two-component, a pure polyurea waterproofing membrane

Sikalastic 383

Liquid-applied waterproofing membrane providing seamless and durable waterproof

Sikalastic®-560

UV-resistant waterproofing membrane designed for long-term roof protection

Sikalastic®-505

Flexible waterproof coating suitable for roofs, terraces, and exposed surfaces

INTERNAL WATERPROOFING

SikaTop®-550M

Flexible waterproofing mortar for concrete and masonry applications.

SikaTop®-550J

Protective cement-based coating designed for waterproofing and concrete surface protection

SikaTop®-550F

- Cementitious waterproofing and protection coating for concrete structures

Sikagard®-1812

- Protective treatment for concrete surfaces, SEWAR providing enhanced durability and long-term protection

Sika® Fastplug-102

- Rapid-setting plugging mortar for instantly stopping water leaks

Sikagard®-190

- Surface protection coating that improves resistance against moisture and environmental exposure

Sikagard®-180

- Protective coating system designed to enhance concrete durability and resistance to aggressive

EPOXY FLOORING

Sikafloor®-1205

- Self-leveling flooring underlayment designed to create smooth, level surfaces

Sikafloor®-1230

- Epoxy flooring system offering excellent abrasion resistance and long-term durability

Sikafloor®-1200

- Penetrates concrete pores to seal the surface and ensures excellent bonding for subsequent coating

Sikafloor® SynTop-430

- Creates a highly durable, wear-resistant, and dust-free surface

Sikadur®-31

High-strength epoxy adhesive for structural bonding, repairs

THERMAL INSULATION

ECOPEARL SHPU-35-34A

- Spray-applied polyurethane foam providing

STONE INSULATION

Sikagard® H115

- Water-repellent treatment that protects masonry and concrete surfaces from moisture penetration

Sikagard® SILICONE

- Silicone-based water repellent that protects façades and concrete surfaces

CONCRETE FIXING

Sikadur® ADH 1414

- High-strength bonding and repair resin designed for structural repairs, bonding

Sikadur® 52

- Low-viscosity epoxy injection resin used for crack sealing

SikaEmaco®-8100 AP

- High-performance repair mortar for structural concrete rehabilitation and protection

SikaEmaco® S 486

- Cementitious repair mortar designed for restoring and protecting damaged concrete structures

SikaAntisol®-1315

- Resin-based curing and sealing compound

SikaGrout®-928

- Precision non-shrink grout designed for structural and industrial grouting applications

SikaGrout®-544

- High-strength non-shrink grout for machine foundations, base plates, and anchoring works

SikaEmaco® N 303

- Non-shrink repair mortar for repairing concrete surfaces and structural elements

SikaEmaco® N 900

- Cement-based repair mortar suitable for large-scale concrete repair applications

Unexposed surfaces insulaion

Sika® Igolflex® 610

- RUBBERIZED BITUMINOUS WATERPROOFING EMULSION

Sika® Igolflex® 620

- RUBBERIZED BITUMINOUS WATERPROOFING EMULSION

Sikalastic® HLM 5000

LIQUID, COLD-APPLIED, BITUMEN-MODIFIED, ELASTOMERIC WATERPROOFING MEMBRANE SYSTEM

Insulation accessories

FLEXTAPE

- LIQUID, COLD-APPLIED, BITUMEN-MODIFIED, ELASTOMERIC

FX-MESH

- fiberglass reinforcing mesh used in repair, waterproofing,

geotextile

Non-woven geotextile fabric

Backing rod

- Flexible closed-cell foam rod used as a backing material in expansion

Sikadur-Combiflex®-930

- Dynamic joint waterproofing bandage

EXPANTION JOINT TREATMENT

Sikaflex®-428

- Flexible sealant for concrete precast

SikaSeal®-411 GG

- TWO COMPONENT GUN GRADE POLYSULPHIDE SEALANT

SikaSeal®-410 PG

- Two component self-leveling polysulphide sealant

Construction joint treatment

SikaSwell® A

- Acrylic swellable joint sealing profil

Sika Waterbar®-940

- Centrally and externally placed PVC Waterstops

ANCHORING STEEL BARS AND BONDING CONCRETE

Sika AnchorFix®-1

- High strength, two component adhesive anchoring system

Sikadur® ADH 1414

- High-strength bonding and repair resin designed for structural repairs, bonding applications
